

Project Title: **SURVIBOTS**

Team Members: **Krunal Badlani**

Guided by: **Dr. Abhishek Rawat**

Survibots is a start-up set up to bring technological advancements in the field of surveillance. We aim to build up robots specially designed to help the security agencies to make their work easier and efficient. Our first product, the Survibot-1 is going to be a drone to keep a bird's eye view on the surroundings of any area it is latched to. We will be further working on full – automatic working of the drone.
