<b>Abstract: (Maximum 350 words)</b>	<p>We Often Observe That During Fatal Fire Tragedies, the Fire Can Be Sometimes Very Hard to Extinguish. One of the Main Reason is That the Fire Spot is Sometimes Too Hard to Reach Manually (for Ex: Tall Buildings). Such Hard-to-reach Fires Can Be Difficult to Extinguish Using the Existing Conventional Equipment. Hence, We Are Looking Forward to Addressing This Issue Through Our Project- QOPTO.</p> <p>Qopto is an Ongoing Project Funded by SSIP (Student Startup and Innovation Policy) involving a Fire-proof Hexacopter Drone Which Will Carry and Drop the Fireballs to the Affected Area(S). Moreover, Qopto Could Be Equipped with Relief Utilities to Aid People Trapped Inside the Fire. In Future, We Would Like to Provide Qopto to the Indian Fire Department, to Ease Their Operation Until the Actual Fire Truck Comes to Rescue.</p>
